

This is Quick Money.

If a kid like me did it all by myself.

Then I guess there's a BIG chance that you can too.

1. Freelance Work

If you got the skills and want to make quick cash online then this one's for you. It's called "freelancing" People hire you to do certain things like web design, content creation, programming, etc, then pay you a pretty decent amount.

Though honestly, I don't like this. It's like slavery for me :P But anyway, it's cash or nothing.

- **Graphic Design Services** – Your right brain is big and bulky, you're creative and know how to use Photoshop. Let's just say you know everything about web design. You can find customers in many forums nowadays, mostly looking for cheap logos and headers around \$5-\$50.

Here are some forums that you should give a try.

- <http://www.wetcanvas.com/forums/>
 - <http://forum.deviantart.com/>
 - <http://www.sitepoint.com/forums/>
 - <http://forums.digitalpoint.com/forumdisplay.php?f=104>
- **Content Creation or Freelance writing** – If you love to write and you're good in research then this is for you. You write articles according to what the customer needs and let him pay you per hour or give him a fixed price per article. Remmeebr to splel cehkcu tuogh :P

Try these webmaster forums, they're always looking for content writers.

- <http://www.sitepoint.com/forums/>
 - <http://www.v7n.com/forums/services/>
 - <http://forums.digitalpoint.com/forumdisplay.php?f=102>
- **Website Coding** – If you're an experienced web developer who STILL hasn't cracked the code on making money online, then maybe it's time to let people hire you. I've seen many people at DigitalPoint looking for coders (Coders are the guys who codes and gives life to a website by converting a PSD or a Picture to a real live website)

Again, webmaster forums are looking for these, so try anything above.

2. Sell emails

Try to do a quick search for “Web Design Las Vegas” in Google (This might not work on some countries because ads are geographically targeted, so I would suggest using a US based proxy). Did you know that the top 1-3 ads under the “Sponsored Links” are paying around \$6 per click?! Or see it for yourself then:

<u>Keywords</u>	<u>Estimated Avg. CPC</u>	<u>Estimated Ad Position</u>
las vegas web design	\$5.78	1 - 3
las vegas web site design	\$6.62	1 - 3
web design in las vegas	\$7.29	1 - 3

Results via the [Google Keyword Tool](#)

This proves those companies are **very serious** and means business, but what if you can provide a solution to them that is much cheaper and much much more effective? (Well, at least in their thoughts)

A possible sale eh? Yes, there was a time when one of my friends shared his experience about this. All he did was gather 100 email addresses from people who were interested in web design, and then he contacted a web design company from one of the sponsored links, did some sales talk, sold the 100 email addresses, and got a quick \$200 in less than a day! Not bad.

But how did he gather those 100 email addresses in just 1 day?

The ultimate answer to this is **forums**. Yes, since forums are mostly high traffic sites due to the fact that everyone can discuss almost anything they want.

Here's how to do it:

1. First, sign-up for an autoresponder (Try [Getresponse](#) or [Aweber](#) but if you don't want to pay the cheap \$20 per month there are always free services out there).
2. Set-up a campaign in your autoresponder, load it up with links to your giveaway product, free ebooks or whatever that people will like.
3. Create your giveaway product or ebook. You can start with the tons of PLR (Private Label Rights) products in your computer. You must edit them heavily.
4. Build a landing page, put the email capture form.
5. Announce your free ebook, giveaway in the forums.

Poof! **Instant** sign-ups.

Extremely Important Note: In your email capture form, tell them that by joining in your list, they will also be subscribed to other newsletters related to the product they are interested in.

3. Affiliate Marketing

Affiliate marketing is a process wherein the publisher (You) promotes a product of the advertiser and whenever a visitor goes to the advertiser (It can be through an affiliate link, coupon, etc.) and the advertiser makes a sale, the publisher gets paid \$\$\$.

In short, **easy cash**.

Affiliate Marketing is a very very BIG world, It can't be explained and made clear in just one page, and NO I won't baby you and feed all the info here. You can always search the internet for more information about this.

Anyway, I've compiled here some links that should help you start:
